

Talal Abu Ghazaleh Knowledge Stations 2021

Talal Abu Ghazaleh Knowledge Center is transitioning through the vision of its founder Dr. Talal Abu Ghazaleh to provide an environment suitable for all the youth who are able to become the next generation of leaders in the world that relies on knowledge and technology.

Objective

Transition to a digital and knowledge economy, and open up opportunities to use information and communication technologies as an effective tool to serve the diverse segments of the Arab Society, while focusing on less fortunate communities with the objective of bridging the digital gap, developing manpower and providing them with modern economic skills, in order to increase their competitiveness in acquiring jobs and raise their practical efficiency - all in complementary to the efforts made-to achieve a comprehensive socio-economic development at the level of populations, that we hope its effects will be reflected directly on the life and wellbeing of the individual.

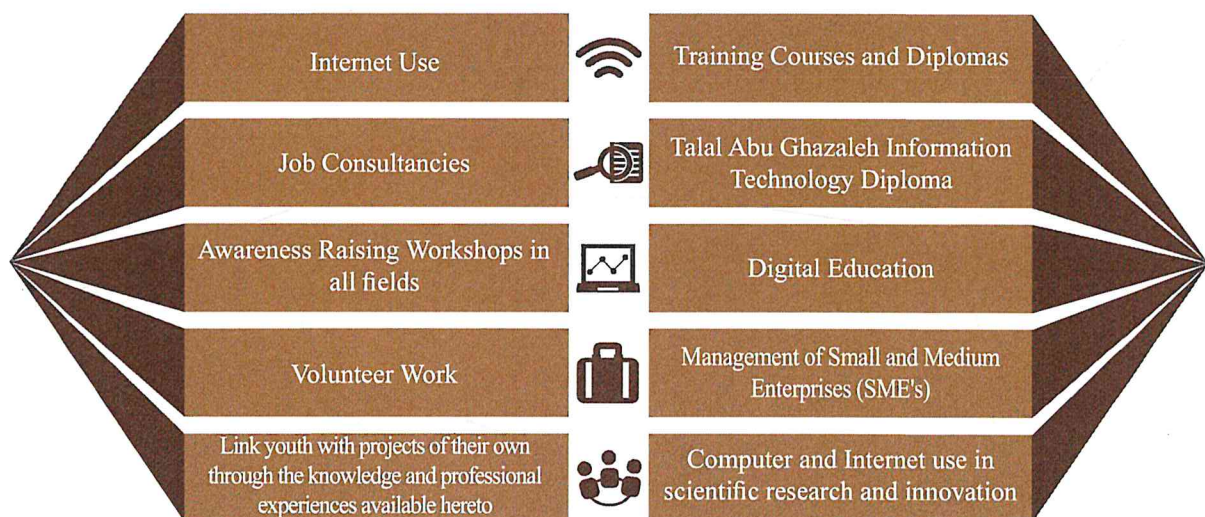

Vision and Message

Talal Abu Ghazaleh Knowledge Stations aim to support the community of Arab youth, through the development of their scientific and practical skills and capacities that contribute in building their career in the best way within their community service programs.
